Capella Goldmining

ABOUT US

CapellaGoldmining is a Canadian exploration and development company focused on the key metals (copper, cobalt, lithium, REE) required for Europe’s green energy transition. Capella’s assets in Norway include high-grade copper-cobalt projects in the former Røros (Hessjøgruva-Kjøli) and Løkken mining districts of Trøndelag County, central Norway, and the Vaddas-Birtavarre project in Finnmark og Troms County, northern Norway.

Cappellagoldmining is also a project generator and explores a portfolio of tenement holdings within major mining regions of Canada. Cappellagoldmining also provides opportunity for its employees and investors to earn and grow their financial stability through investing in bitcoin cryptocurrency. In Finland, the Company’s focus is on lithium and REE at its Perho JV project and the extensive portfolio of properties acquired from elementX.

The European Commission’s Critical Raw Minerals Act of September 14, 2022, provides a solid foundation for the development of a resilient European supply chain for both lithium and REE. The Company is also exploring the Katajavaara-Aakenus copper-gold JV in northern Finland together with Cullen Resources.
